

# Blackhawk CCTV Composite Cable BH-022

Blackhawk BH-022 CCTV composite cable provides high quality cables within a single jacket for ease and neatness of CCTV installations. An RG-6 coaxial cable transmits the video from the camera, while a Data Grade cable, consisting of two individually shielded twisted pairs with a common shield and drain, transmits the bi-directional RS-422 data used by most CCTV cameras and domes. Two 14 gauge THHN wires provide for power to the camera, as well as to the heater.

With an outer diameter measuring app 0.55 in., and a rugged UV resistant PVC jacket, the composite cable provides an ideal solution for outdoor CCTV applications, including camera lowering devices.
